PTS BASEMENT BAUFIX BB100 & BB200

UNDERGROUND BASEMENT PACKAGED PUMPING UNITS

020 8778 4271

PTS BASEMENT BAUFIX BB100 & BB200

Underground Basement Packaged Pumping Units

Small underfloor packaged pumping units to pump seepage water from behind basement tanking membranes, grey water from utility rooms. As the sump and pump forms the centre of the drainage system it is essential that it is of a high quality in order to handle the anticipated levels of water entering the basement.

These units can also be used for the drainage of domestic waste water from washbasins, sinks, showers and washing machines.

The pumps are self venting vortex units with 10mm solids handling capacity, fitted with integral non return valve and having built in thermal motor protection.

Available in both **70** and **220** Litre Tanks

Sealed covers and mains/battery alarm are available as accessories

For more information on these systems, please contact our Sales Department on 0208 778 4271
