Pump Technical Services/Jung Pumpen UK are able to provide the total package of provisions and solutions in the pumping world. With our vast range of Jung Pumpen products from surface water drainers, domestic and commercial sewage package systems to large submersible pumping stations, there is no pumping problem too small or large for our organisation to handle.

Incorporated within our company is a highly experienced sales and design department, available to assist in pump selection.

Throughout the UK commissioning, installations, maintenance, service and breakdowns are all carried out by our directly employed engineers. Organised through our Contracts and Service department, controlled from our head office in Beckenham.

For catalogues and product brochures please contact our office.

We also offer our full pump engineering programme on C.D.

THAT'S WHAT WE ARE

▶▶▶▶▶▶▶▶▶▶ THE BETTER DECISION

The range of pumps we manufacture and sell are designed to meet every demand for the pumping of sewage, treated effluent, drainage and surface water, from a selection including vortex, single channel or grinder pumps and complemented by our range of domestic/commercial WC macerator units.

Pumps for mounting in sumps can be freestanding or on guide rail systems, or customised package systems can be supplied for below ground or floor mounting. Our wide and varied customer base includes water/municipal authorities, civil contractors and government offices.

We are able to install, service and supply all your submersible pump needs throughout the UK including Northern Ireland.

The UK is controlled directly via our Head Office and large warehouse facilities in Beckenham, Kent. We also have satellite depots in Scotland and Wales as well as dedicated distributors throughout the UK.

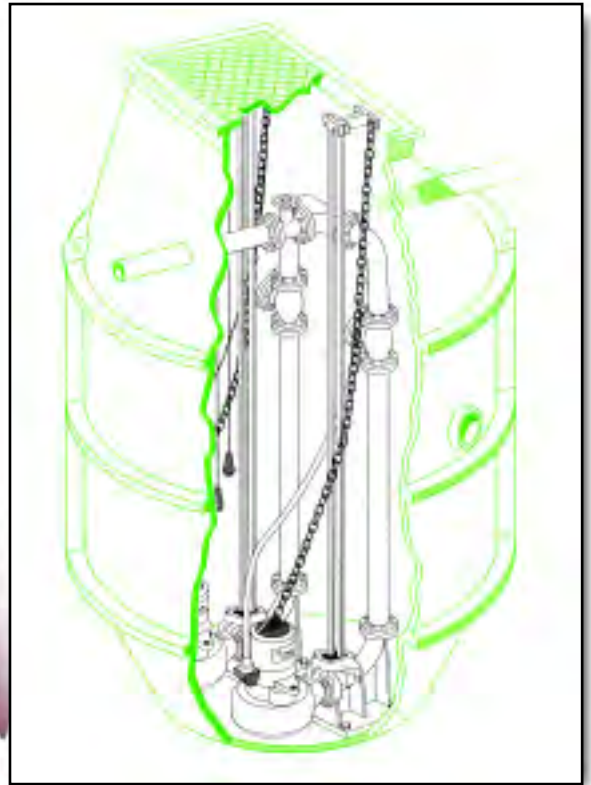

Our Contract and Service Departments offer a wide choice of services from the installation and commissioning of our own Jung Pumpen range of submersible pumps, including packaged systems, G.R.P. vessels, tank sets and individual pumps through to regular servicing and emergency attendance of our own vast range of Jung Pumpen equipment, and including that of all other leading manufacturers.

A fundamental part of our service is the comprehensive commissioning of your Jung Pumpen equipment carried out by our engineers directly after installation. This commissioning ensures your equipment is fully and correctly set up for the system into which it has been integrated and minimises the risk of future operating problems.

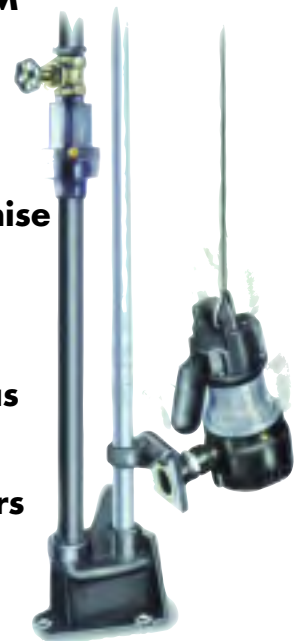

programme, following handover of the installation from the contractors. However we also recommend that our own commissioning Engineers carry out the initial commissioning as this then validates our warranty conditions.

Our fully stocked mobile service vehicles provide our engineers with all they need to carry out maintenance, adjustments and any repairs needed to pumps and related equipment.

PTS/Foulmaster

Our trained and experienced commissioning managers submit as standard a detailed report and O & M manuals, which provide the information necessary for those customers wishing to organise their own maintenance

THAT'S WHAT WE ARE

For the past 80 years Jung Pumpen in Germany, and for over 33 years in the UK, Pump Technical Services Ltd have been the specialist for pumping solutions. We provide the engineering solutions, from the smallest household pumps to pumping stations for municipal wastewater disposal - we rank among the innovative visionaries and problem-solvers in this market.

And you can be sure that you are buying "made in Germany" quality. Our quality assurance guarantees it with a refined control system.

Since the beginning of 2004, we have the Jung Pumpen Forum, our state-of-the-art information and communication centre. Here we offer special seminars for installers, wholesalers, planners, plant engineers and underground construction engineers. These seminars offer a practically-orientated look at the operating mode and installation of our pumps and lifting systems.

In all aspects, dialog with you is very important. Your requirements and wishes are incorporated into the development of new product ideas - so that we remain your competent partner for drainage solutions in the future.
