- Plancofix plus < 30 dB(A)

DESCRIPTION

Plancofix is a floor drainage pump that allows barrier-free or low entry showers to be fitted even where the lack of a gravity drain ruled out this option in the past. It must not be used for back flow protection.

Set into the screed, the Plancofix forms the floor drain in tiled showers. The incoming water is pumped to the nearest down-pipe through a 1 inch pressure pipe. The transfer point into the downpipe must be at least 25 cm above the Plancofix.

The inflow from the shower can enter either directly from above through the floor drain, or from the side through a connecting branch.

The Plancofix plus has a smaller motor, which allows the a lower installation depth of 9 cm including the insulation tray. It is recommended for installation situations where only very low heights must be overcome.
