## DRAINAGE PUMPS

- For saline solutions up to 15 % salinity
- Cooling jacket for motor housing
- Low level pumping by detachable strainer base
- Flushing device activatable and deactivatable
- Variable discharge branch with closable ventilation
- Safe to run dry
- EIP Technology
- SiC mechanical seal
- Moisture sealed cable inlet

### DESCRIPTION

The U3 K(S) special is a variant of the U3 K(S) designed to pump aggressive media such as brine from water softeners, brackish water, condensate from gas condensing boilers, silage liquid, whey or liquid fertilizer.

Residential grey water from dish washers or washing machines (even boil wash program) or outdoor applications like drainage or rainwater can easily be handled by this pump.

Depending on the application it can be used either in a fix installation or as a mobile pump. For fix installations the pump can be combined with existing sumps but also with a variety of our chemically resistant tanks.

Aggressive media are not precisely specified and occur in countless different compositions. In order to provide reliability and warranty, please contact our technical support for consultancy.

The U3 K(S) special provides the same technical features like the standard model U3 K(S). Guide rail systems offer the advantages of quick and easy maintenance. The Easyfix installation sets are particularly convenient. They are pre-assembled ready to plug in and can be installed as single or duplex systems.

Despite its high range of possible applications, the U3 K(S) special must not be used to pump effluent containing faeces or wastewater from urinal systems.

If submersible pumps are being used outdoors, the mandatory minimum length of the power cord is 10m. This is a directive from the VDE regulation 0100.

### PERFORMANCE

Type	Delivery head H [m]	1	2	3	4	5	6
U3K spezial/U3KS spezial	Flow rate Q [m³/h]	6.5	6.0	5.7	5.0	4.0	2.4

Specifications can be changed without notice. Performance subject to ISO 9906 tolerances. The minimum flow velocity in the pressure piping must be 0.7 m/s according to EN 12056. This data is represented in the performance curve as a limit of application.

### SCOPE OF SUPPLY

Pump ready for connection acc. to EN 12050 with 90°, 1/4" female connection elbow, cable and plug, S model with automatic level float switch.

### MECHANICAL DATA

Pump	Vertical single-stage	Run dry protection	Yes
Free passage	10 mm	Shaft	Stainless steel
Bearing	Ball bearings, grease-lubricated	Impeller	Vortex impeller, GFK
Seal on motor side	Rotary shaft seal	Motor housing	Stainless steel
Oil chamber	Yes	Pump housing	GRP
Seal on medium side	SiC mechanical seal	Submersible	Yes
		Pressure outlet	1 1/4"

### ELECTRICAL DATA

Voltage	1/N/PE-230 V	Type of enclosure	IP 68
Motor rating P1	0.32 kW	Insulation class	B
Motor rating P2	0.22 kW	Winding thermostat	Yes
Current	1.4 A	Motor protection	Integrated
Wires	3G1,0	Plug	Safety

In case of installation beneath the backpressure level the pressure tube must be taken in a loop over the local backup level acc. to EN 12056. Besides, it must be secured with an EN 12050-4-proofed swing-type check valve. Additionally we recommend an alarm system.  
 In accordance with EN 12056-4 section 5.1, it has a built-in automatic spare pump or a double attachment included, which ensures that sewage drainage is not interrupted.
